E Lite® Plastic Equipment Pads

E Lite® is a plastic pad designed as a mounting base for air conditioning condensers. The rugged design provides uniform and generous ribbing for optimum, self-leveling ground support without inserts. E Lite® is injection molded from polypropylene, resulting in a pad that is lightweight, but not too light. A subtle texture prevents unit slide and presents a classic appearance, which is enhanced by rounded edges and a concrete gray color. Each pad is molded with its size in raised letters.

This information is available as a contractor handout.
Order item number LIT-FLY-ELITE.

TECHNICAL DATA

MATERIAL

Polypropylene

FREEZE/THAW

Flawless performance under the 25-cycle regimen specified by ASTM C67

CHEMICAL RESISTANCE

Does not crack, flake, or warp when tested per ASTM D2299 with the following:

- R-22 and R-134a
- Synthetic canine urine
- Compressor oil
- Salt solution, 20% by volume

Each pad is molded with its size in raised letters.

FEATURES AND BENEFITS

- Lightweight, yet rugged
- Drillable for securing unit
- Uniform ribbing transfers load evenly
- Unaffected by UV or weather
- Subtle texture resists unit slide

The bottom of a 2" E Lite® pad shows extensive ribbing.

The bottom of a 3" E Lite® pad shows ribbing plus additional surface support.

E Lite® plastic equipment pads are manufactured at DiversiTech's Conyers, Georgia plant.

Hef-T-Pad™ Equipment Pads

Hef-T-Pad™ is an injection molded equipment pad created from high impact polypropylene with UV inhibitors making it easy to handle, yet durable and strong. It does not require any additional equipment for moving and handling. Hef-T-Pad™ is resistant to impact, ultraviolet degradation and weathering and will not crack, flake, or warp. It is virtually impervious to climatic variations. Hef-T-Pad™ is drillable to permit installation of refrigerant and electrical lines under and through the pad and to allow equipment to be easily secured to the pad.

This information is available as a contractor handout.
Order item number LIT-FLY-HEF.

FEATURES AND BENEFITS OF THE HEF-T-PAD™

Stabilization foot increases the surface area for bearing stabilization on soil; reduces sinking in soft soil under heavy load. Support ribs provide structural support.

Stabilization flange provides a wide perimeter that reduces sinking in soft soil under heavy load. Both the flange and ribbing provide reinforcement for the corners.

The thick walled polymer is suitable for drilling and screw fastening of equipment, line sets, and electrical connections.

Attractive neutral gray color with pad size and branding clearly embossed on pad surface.

Textured surface provides good aesthetics and a non-skid surface.

Pad size is molded into the side of the pad as well as the top surface.

The Black Pad® replaces Concrete Equipment Bases

Eco-friendly

An innovative equipment base, The Black Pad® uses ground, recycled rubber in a co-injection process. The pad is extremely durable, resistant to ultraviolet light, and heavier than a completely plastic pad. The Black Pad® is ideal for pool and spa pumps, filters and heaters. The Black Pad® is extremely weather resistant and easy to drill and secure pool and spa equipment.

This information is available as a contractor handout.
Order item number LIT-FLY-BPPPOOL.

- No cracking and less breakage than concrete
- Extremely durable, yet lightweight
- UV resistant; unaffected by weather
- Generous ribbing for optimum, self-leveling ground support
- Outer edges have rounded corners with double-thick walls
- Uniform ribbing transfers load evenly
- Textured surface prevents equipment slippage
- Drillable for securing equipment
- Made of recycled material
- ICC Certified to 1997 Standard Swimming Pool Code sections 305.2 Mounting and section 405 Equipment Foundations and Enclosures.

UltraLite[®] Equipment Pads

UltraLite[®] Pads are made by DiversiTech, North America's largest manufacturer of equipment pads.

FEATURES AND BENEFITS

LIGHTWEIGHT At an average weight of 2-1/2 pounds per square foot (12 kg. per square metre), the UltraLite lightweight concrete pad is one of the lightest equipment mounting products available today. Lightweight products are important for ease of handling on job site.

DURABLE The exterior of the UltraLite lightweight concrete pad is specifically engineered for long-term exterior weather resistance.

DUCTILE The skin and core of the UltraLite lightweight concrete pad is specifically engineered for flexibility and ductility demanded of job site handling. Additionally, the ductility of the outer skin facilitates conformance to slight ground contours without fracture.

TIME/LABOR SAVINGS Time is money, and hence any time savings on site translates into money saved. The UltraLite lightweight concrete pad literally installs in seconds while providing a solid foundation for the condensing unit.

CONCRETE SURFACE The concrete external skin of the UltraLite lightweight concrete pad is not subject to ultraviolet degradation or weathering discoloration.

VIBRATION ABSORBING The engineered polystyrene core in the UltraLite lightweight concrete pad absorbs and dampens vibration associated with normal operation of a condensing unit.

FREEZE/THAW RESISTANT The UltraLite lightweight concrete pad is vapor permeable. Water vapor evaporates through the pad, hence the concrete outer skin is not subject to expansion cracks.

FLAME RESISTANT The concrete outer skin of the UltraLite lightweight concrete pad is resistant to heating caused by the compressor. Additionally, the surface is resistant to heat from incidental torch flame during site installation.

OUTSIDE STORAGE The UltraLite lightweight concrete pad is intended for life in the outdoors. As such, the pad is suitable for exterior storage prior to site installation.

TECHNICAL DATA

LOADING

To achieve the maximum permissible pad load capacity, the earth under the pad must be capable of supporting the transmitted compression load of the UltraLite pad. All values tabulated assume the earth has a bearing capacity of at least 1000 pounds per square foot (48 kPa).

The allowable loads assume a uniformly distributed loading on the pad surface (that is, a relatively flat-bottomed condenser unit in contact with the pad). For condenser units with footpads or other point loads, the maximum concentrated load for any size UltraLite pad is 125 pounds per 2" (56 kg per 50 mm) diameter (or equivalent surface area) footpad.

CHEMICAL RESISTANCE

In normal usage conditions an equipment pad can be exposed to a variety of chemicals. The UltraLite pad has been fully tested in accordance with ASTM D2299 for resistance against:

- R-22 and R-134a
- Compressor oil
- Salt solution, 20 percent by volume
- Synthetic canine urine

The UltraLite pad performs extraordinarily well under these testing criteria. UltraLite does not craze, soften, delaminate, or spall under exposure in this test.

FREEZE/THAW TESTING

The UltraLite pad has been independently tested to the rigorous freeze-thaw regimen specified by ASTM C67. This standard dictates a twenty-five cycle freeze-thaw sequence. The freeze portion of the sequence takes place with the top surface of the UltraLite pad under 1/2" (12 mm) of water. Once twenty-five cycles are complete, the pad is examined using visual magnification. No cracks or crazing is permitted. UltraLite has performed flawlessly.

CladLite® Equipment Pads

Tough. Durable. Strong.

CladLite® Equipment Pads provide the strength and durability customers demand in an easy to install pad. CladLite® Pads are up to 80% lighter than solid concrete but still provide rock solid support for equipment. Once it's set, so are you. CladLite® Pads stay in place and can withstand anything mother nature can throw at them. These pads provide superior resistance to sun, moisture, and freeze-thaw conditions. And the vibration dampening EPS foam core is unaffected by water, soil, fungus or bacteria. CladLite® Pads are available in 2" and 3" thickness and more than 70 different sizes so you can get the exact pad you need for the job. Get the concrete pads that homeowners prefer – CladLite®.

CLADLITE® SPECIFICATIONS

Allowable Load: 125 lbs. per 2" diameter foot

Freeze/Thaw: Flawless performance under the 25-cycle regimen specified by ASTM C67

Chemical Resistance: Does not craze, soften, delaminate, or spall when tested per ASTM D2299 with the following:

- R-22 and R-134a
- Compressor oil
- Synthetic canine urine
- Salt solution, 20% by volume

Foam Core: ASTM Type 1 EPS

Flame Resistance: Cladding resists compressor heat and incidental torch contact. Not to be used under heating devices.

Heat Pump Pad™

Ideal for snowy climates, the new DiversiTech Heat Pump Pad™ is the perfect solution for protecting equipment and ensuring proper operation year round. The Heat Pump Pad™ provides a full 8" clearance from ground level in a compact 36" square footprint. Included with every Heat Pump Pad™ are 8 anti-vibration pads, specifically molded into slots in the pad to reduce vibration and provide quiet operation of your equipment. The base of the pad is also angled to direct melting snow or condensate away from the unit and pad. Heat Pump Pads are made from recycled polypropylene so they are eco-friendly and are built tough to provide many years of service. These pads also nest together for easier transportation and warehousing.

Each Heat Pump Pad™ includes eight Anti-Vibration pads to reduce equipment vibration and noise.

This information is available as a contractor handout.
Order item number LIT-FLY-HEAT.

The Hurricane Pad™

THE HURRICANE & THE HURRICANE T-CLASS PADS

Hurricane Strength Equipment Pads designed to Florida's tough standards.

- Steel reinforced
- 9,000 PSI fiber-concrete
- Much lighter than solid concrete
- The Hurricane Pads keep units from sliding or blowing over in 150 MPH winds when properly attached (see The Hurricane T-Class Pads section at right for exceptions)

FLORIDA BUILDING CODE NOTICE

This product meets the following Florida Building Code requirements:

1. Florida Building Commission (DCA02-DEC-183) declares this pad to be an acceptable alternative material to solid concrete pads.
2. This pad meets Mechanical Volume, Section 304.9 – clearance from grade.
3. Pad weight and wind load requirements have been calculated by Master Consulting Engineers. For up to date calculations and documentation, visit our website www.diversitech.com.

This information is available as a contractor handout.
Order item number LIT-FLY-HPAD.

THE HURRICANE T-CLASS PADS

For certain taller equipment profiles that are used in high wind zone areas, T-Class pads may be required. For a complete list of pad sizes and information, please go to www.diversitech.com.

Equipment must be properly attached to The Hurricane Pad™ or The Hurricane T-Class Pad™ in order to prevent sliding and tipping in high winds.

Anti-Vibration Pads

EVA™ PAD: The BEST Performer

EVA™ (Extreme Vibration Attenuation) is the latest generation in vibration dampening technology. In the most severe vibration extremes, testing shows the EVA™ pad outperforms cork and rubber by greater than 3:1 and outperforms our competitor's "waffle" pad by greater than 8:1! The enhanced performance comes from the special composite foam center which is structurally more sound than cork. EVA™ is not affected by oils or chemicals that can break down cork and is much more effective at vibration dampening than solid rubber. Designed to withstand 50 psi. Choose EVA™ to get the best of both worlds!

ANTI-VIBRATION PAD PERFORMANCE

This information is available as a contractor handout.
Order item number LIT-FLY-AVPAD.

RUBBER/CORK PAD: The Industry Standard

These pads are made with the highest quality elastomeric oil resistant padding. Designed to withstand 50 psi. The rubber pads are corrugated on both sides and laminated to the cork center.

ISO-CUBE: Solid Rubber Tough

Natural rubber pads designed to reduce vibration and noise emanating from refrigeration or AC equipment. Circular design offers a suction cup effect eliminating the need to bolt the pads down. A standard 18" pad divides into eighty-one 2" segments which may be cut or torn into smaller pads. The 50 durometer pads will withstand a load of 180 psi with great resiliency.

A/C Brackets

DiversiTech offers a complete selection of quality air conditioning brackets for standard and mini-split condensing units.

AIR CONDITIONING BRACKETS

These heavy duty 1/8" thick steel A/C brackets are perfect for hanging A/C condensers and heat pumps outside the home.

Hef-T-Bracket™

HEF-T-BRACKET™ TYPE 2

These brackets feature a cross bar that is attached to a wall and two L-shaped brackets that are hooked and bolted into place on the cross bar.

When operating in heat pump mode, the unit will produce condensate which is easily captured and managed using this snap on drain pan.

Hef-T-Block™

HEF-T-BLOCK™

For use as mounting bases when condensing units must be bolted down. End caps are also available for aesthetics.

Hef-T-Frame™

The flexibility of the Hef-T-Frame™ equipment support system means that “designing” is simple. It is a perfect solution for mounting any type of equipment. Simply start with a Hef-T-Frame™ Base and add as many Hef-T-Frame™ Extenders as needed to create your own system.

See pages 188-189 for more information on the Hef-T-Frame™ equipment support system.

ULTRALITE® LIGHTWEIGHT EQUIPMENT PADS

A true concrete equipment pad at the weight of plastic (about 2.5 lbs. per square foot). UltraLite® is strengthened by miles of fiber in each square foot of fiber-cement coating. This fiber allows the pad to flex instead of cracking or breaking. The textured surface prevents the condensing unit or portable generator from sliding, and allows water drainage, while the engineered encapsulated polystyrene (EPS) core prevents warping and provides a solid bottom to resist settling. Unaffected by soil conditions, ultraviolet (UV) light, temperature extremes, and other weather conditions.

3" UltraLite® Pads

Where local codes supersede the International code and require a pad thicker than 2" – 3" UltraLite® is the solution.

2" UltraLite® Pads

The 2" thick UltraLite® pad is the industry standard. Used across a wide variety of applications, unless a thicker pad (3") is required by the local building code.

UltraLite® Earthquake Code Compliant Pads

Required nearly exclusively in Southern California, the UltraLite® pad is available for compliance with strict attachment provisions detailed in earthquake prone local building codes.

UltraLite® earthquake code compliant pads are only available for sale in regions where local codes mandate installation of pads with these particular characteristics. Currently these locales include most of Southern California, portions of Washington, and portions of Oregon.

CLADLITE® LIGHTWEIGHT EQUIPMENT PADS

Concrete surface and superior performance at 20% the weight of conventional concrete pads. The cladding provides superior resistance to sun, moisture and freeze-thaw conditions; the engineered encapsulated polystyrene (EPS) core is virtually impervious to water, soil conditions, fungus and bacteria. CladLite® is further strengthened by continuous steel reinforcement throughout the cladding. CladLite® is code approved for installation throughout the U.S.

2424-2

3" CladLite® Pads

Used where local codes supersede the International code and require a pad thicker than 2".

2424-3

2" CladLite® Pads

The 2" thick CladLite® pad is the choice for equipment pads, unless a thicker pad (3") is required by the local building code.

The Hurricane Pad™

Designed specifically for the hurricane prone regions of Florida and the Gulf Coast, The Hurricane Pad™ meets stringent local code requirements for wind resistance. Heavier than a normal concrete pad, this 4" pad provides sufficient weight to meet code. For certain taller equipment, The Hurricane T-Class Pad™ is needed. Due to their extra weight, standard freight terms only apply for shipments to Florida. All other shipments are shipped FOB Conyers, GA.

H2424-4

The Hurricane T-Class Pad™

The Hurricane T-Class Pad™ is even heavier than The Hurricane Pad™ and is designed to meet the higher wind loads of taller equipment. The taller the piece of equipment mounted to the pad, the greater the wind load on the pad. These heavier 4" pads provide sufficient weight to meet code for these taller condensing units. Due to their extra weight, standard freight terms for The Hurricane T-Class Pad™ only apply for shipments to Florida. All other shipments are shipped FOB Conyers, GA.

THE BLACK PAD®

The Black Pad® – 2"

The Black Pad® is an innovative equipment pad using ground, recycled rubber in a co-injection process. The pad is extremely durable, resistant to ultraviolet light, and heavier than a completely plastic pad. The Black Pad® is suitable for use with pool pumps, filters, and heaters and complies with the 1997 Standard Swimming Pool Code sections 305.2 Mounting and section 405 Equipment Foundations and Enclosures.

HEF-T-PAD™

Hef-T-Pad™ – 2"

Hef-T-Pad™ is an injection molded equipment pad created from high impact polypropylene with UV inhibitors making it easy to handle, yet durable and strong. It does not require any additional equipment for moving and handling. It is resistant to impact, ultra violet degradation and weathering and will not crack, flake, or warp. The Hef-T-Pad™ is virtually impervious to climatic variations. It is drillable to permit installation of refrigerant and electrical lines under and through the pad and to allow equipment to be easily secured to the pad.

HEAT PUMP PADS

Heat Pump Pad™

Provides an effective base for heat pump equipment installed in snowy climates. Rather than a combination of a typical 2" (or 3") equipment pad and 6" heat pump risers, the Heat Pump Pad™ provides a full 8" of elevation in a simple 36" by 36" footprint. The star pattern of the integral risers allows for installation of equipment with different size footprints up to 36" X 36". Also included are eight anti-vibration pads uniquely designed to fit into the guide slots on the top of the integral risers. The base is sloped outward to allow for easy drainage of condensate or defrost cycle condensate when the outdoor coil is operating in heat pump mode. Nestable for efficient shipping, transportation, and warehousing. Injection molded from concrete gray, recycled polypropylene material, the Heat Pump Pad™ is environmentally friendly and designed to last longer than the equipment it supports. Patent(s) pending.

Hef-T-Block™

Used as mounting bases when condensing units must be bolted down. Available in three lengths. End caps are also available for aesthetics. Furnished complete with mounting bolts. Maximum load capacity is 900 pounds per mounting block. Installation temperature range from -4F (-20C) to 140F (60C). Hef-T-Blocks fit all mini-split condensing units with a unique sliding rail feature.

CATALOG NO.	DESCRIPTION	UOM	ORDER MULTIPLE
230-MB14W	14" Hef-T-Block™ (White), pack of 2	PK	1
230-MB17W	17" Hef-T-Block™ (White), pack of 2	PK	1
230-MB36W	36" Hef-T-Block™ (White), pack of 2	PK	1
230-MBCW	Hef-T-Block™ End Cap (White), pack of 4	PK	1

Hef-T-Bracket™ (Type 3)

Used for supporting condensing units, Hef-T-Brackets (Type 3), just like Hef-T-Brackets (Type 2), feature a cross bar that is attached to a wall, and two L-shaped brackets that are hooked and bolted into place on the cross bar. The condensing unit is mounted onto the L-shaped brackets, and fastened using the bolts and anti-vibration washers provided.

The Hef-T-Bracket™ (Type 3) features an innovative locking mechanism called Easy-Fit™. Easy-Fit™ enables the arms to be joined to the uprights in a matter of seconds. A spring-lock automatically secures the joint, preventing the arms from being dislodged accidentally. All brackets are furnished complete with an integral bubble level to make correct installation of the crossbar easier.

CATALOG NO.	DESCRIPTION	ARM LENGTH	LOAD RATING PER ARM	UOM	ORDER MULTIPLE
230-B3M	Hef-T-Bracket™ (Type 3) – Medium	19"	100#	EA	1
230-B3L	Hef-T-Bracket™ (Type 3) – Large	21"	150#	EA	1

ANTI-VIBRATION PADS

E.V.A. Anti-Vibration Pad

The latest generation in vibration dampening technology. The most effective vibration dampening pad available on the market. The EVA Pad was tested against other pads at four different vibration settings. In the most severe vibration extremes, the EVA Pad outperforms cork and rubber by a margin of greater than 3:1! This is due to the special composite foam center which is much more structurally sound than cork. It is not affected by oils or chemicals that can break down cork and is much more effective at vibration dampening than solid rubber. All this at a very competitive price. Designed to withstand 50 psi.

Rubber/Cork Anti-Vibration Pad

Highest quality elastomeric oil resistant padding. Designed to withstand 50 psi. The rubber pads are corrugated on both sides. The cork is laminated between two corrugated pads. Ideal for air conditioners, compressors, cooling towers, presses, machines, etc.

MP-18	18" x 18" x 3/8" Rubber	EA	6

Iso-Cube Economy Anti-Vibration Pad

Natural rubber pads, designed to reduce vibration and noise emanating from refrigeration and air conditioning equipment. The circular design in each pad offers a suction cup effect, which eliminates the need to bolt the pads down. A standard 18" (46cm) pad is divided into eighty-one 2" (5cm) segments, each of which may be cut or torn to provide smaller pads. These 50 durometer pads will withstand a load of 180 psi with greater resiliency.

CATALOG NO.	DESCRIPTION	UOM	ORDER MULTIPLE
ISO-2	2" x 2" x 3/4" Iso-Cube	EA	24
ISO-4	4" x 4" x 3/4" Iso-Cube	EA	12
ISO-18	18" x 18" x 3/4" Iso-Cube	EA	6

Silent Support Anti-Vibration Pad

Silent Support is DiversiTech's recycled rubber anti-vibration pad. When placed under highly vibration prone equipment, it will absorb much of the energy and prevent most unwanted noise. If the equipment needs to be slightly raised, the Silent Support can form an interlocking stack.

CATALOG NO.	DESCRIPTION	UOM	ORDER MULTIPLE
MP-6S	6"W x 6"L x 1-1/2"H Recycled Rubber, pack of 4	PK	4
